Are Children Safe in Cyberspace?

With 77% of youth being contacted by online predators by age 14, we all need to take action! “Staying Safe in a Wired World” helps parents understand the risks that lurk online and give them the tools they need to keep kids safe in Cyberspace.

This book explains applications used by children in this day and age, and is a resource families can refer too when required, which assist them in understanding the Internet and what their children are doing online. It includes acronyms used by kids when they chat online as well as step by step instructions on how to monitor what their children are doing online. The Internet can be an intimidating place for adults, however, using the information contained in this book parents can feel more at ease and informed about what cyberspace is all about.

Rob Nickel, a 14-year veteran of the Ontario Provincial Police, put his knowledge of Internet crimes to use in this information-packed book that will help parents keep their children safe in a wired world.

After working 7 years online undercover dealing with predators who try to harm our children, Rob took his experiences and put together an Internet safety book like no other. He uses investigations from his past to help teach parents the dangers that are lurking online, and give them the tools they need to keep their kids buckled up on the Information Highway.

This book was written for the parent - by a parent, one who knows that the Internet can be intimidating, and confusing. It covers most of the applications used on the Internet by our children and gives instructions on how to help keep our children safe while online.

Included is a CD featuring a video presentation, printable files for parents, as well as a free 3-month subscription to RAZZUL, the safe browsing software for children 3 to 12 years old.
